#### **EXECUTIVE SUMMARY**

### **Opportunity**

- Cleaners in drilling industry are ineffective and expensive.
- Cleaners are not formulated properly to do the job effectively
- Too many cleaners on the job site

#### **Customers**

 Oil and gas drilling contractors in the Permian Basin

## **Marketing**

• Direct sales with demonstrations and face to face pitch

#### **Purpose**

- We provide our drilling crews a safer working environment
- Help increase production for drilling crews

#### **Differentiators**

- 20 years of oil and gas cleaning expertise
- One cleaner that replaces all 250 types of other rig cleaners
- Perfect formulas custom to drilling rigs for cleaning

## **Start-up Costs**

Owner investment - cash	\$ 10,000
Owner investment - equity	-
Vehicle and/or equipment loan	-
Start up financing	200,000
Total start up costs:	\$210,000

#### **Solution**

• We supply custom oil and gas rig focused cleaners, degreasers solvents

#### Extras

- 20 years of experience
- Proprietary formulas
- Expert training and consulting for crews
- Personal relationships with many oil crews

## Financials & Extras

Sales:	\$1,294,800	100%
COGS	259,700	20%
Gross profit	1,035,000	80%
Overhead	35,500	3%
Pretax income	999,400	77%
Tax expense	249,800	19%
Owner withdrawals	44,000	3%
Net income	\$ 705,600	54%

#### **LEADERSHIP STATEMENT**

CEO: Jonathan is a seasoned and proven field sales manager, corporate trainer and at his core a leader by unbeatable performance in the clutch. A decorated veteran of the United States Navy Hospital Corps with five deployments over 10 years with the Fleet Marine Force. Jonathan uses an integrated team approach to building sales teams that are trained to a razors edge and able to adapt to changes in their areas of responsibility. 20 plus years of hard-earned experience has established Jonathan as a proven expert in oil and gas cleaning solutions and his proven knowledge in process cleaning is without question of equivocation. He has extensive real-world experience in materials management, logistics, chemical blending, research and development, marketing, mass communications and customer service. He has an associate's degree in business administration from Erie Community College coupled with real world success as a pioneer in private business ownership. Jonathan is a powerful addition to any organization.

**CMO:** Zachary's strengths as a leader are dependability, being goal oriented and honesty. He showcases consistent and knowledgeable leadership skills that will motivate his workforce to achieve success. Z. Jones also has an extensive work history in relocation and restoration services. He has over five years of work experience in these professional areas. He has a high school diploma and a certification in Telecommunication Technologies.

**CFO:** Martavious is an excellent leader, and he is a great listener that has the ability to complete tasks that need to be taken care of. He has a can-do attitude making him a valuable asset to any employer or industry. He is a caring individual with many years of experience in the landscaping industry as well as some time spent working warehouses. He is an outstanding person.

**COO:** Glenver is a very motivated and compassionate leader. He has very high work ethic and delivers results in a timely manner. He exudes excellent leadership skills. He has very high standards and expects the same from all his employees. He has over seven years of experience in the glass industry. He has his certification in heavy equipment, CPR and OSHA.

#### PRODUCT/SERVICE OFFERING

Redoubt Solutions is a cleaning chemical distributor focused on the oil and gas producers in the Permian Basin. We will distribute a variety of different cleaning chemicals. Our three products will be a concentrated alkali based all-purpose cleaner/degreaser, a citrus based solvent degreaser concentrate and an ultra-concentrated caustic-based degreaser. Our all-purpose cleaning/degreaser will account for 60% of our total revenue, our citrus based degreaser will account for 20% of our revenue, and our caustic-based degreaser will account for the remaining 20% of our revenue. Our plan is to open our facility in Odessa, Texas in the first quarter of 2028. Our flagship product will be our biodegradable, non-toxic, concentrated all-purpose cleaner/degreaser that is a proven solution at a 10:1 dilution to meet and exceed the needs of our drilling and frac contractors. It is as safe as it is strong and can be used by anyone cleaning anything from glass to degreasing motors. Our citrus based cleaner will be a D-limonene based solvent degreaser. It will be concentrated, biodegradable and non-toxic while being strong enough to replace the most aggressive solvents. Our caustic based hard core degreaser will be a concentrate that can be diluted to 60 to 1 and will be designed with an extreme high viscosity so it holds vertical surfaces longer.

We will be a direct marketing company that actually demonstrates our cleaners, and not just a drop off from a catalogue like our competition. Our three products will be packaged in recyclable packaging and all will be readily biodegradable as a concentrate. Our cleaners will be free rinse and we will offer the option of ready to use totes if our customers prefer that option. All products will be offered in a wide range of packaging sizes from single gallons, five-gallon buckets, 55-gallon drums as well as 300-gallon totes of concentrate, and we will be able to fill and refill larger holding tanks for larger pressure washing bays.

To add to our competitive advantage, we are available 24/7 and can assure four-hour delivery to anywhere within a 120-mile radius. Our intentions are to expand our services to include pressure washer rentals, sales and service. As our footprint increases, we will add contract cleaning of rigs during moves and frac tank cleaning. We will offer consulting services to assist our customers with clean in place process cleaning from concept to implementation. We are committed to our customers and their ability to do their jobs safely and with the results they need.

#### **MARKET/INDUSTRY**

Oilfield cleaning chemicals is a broad market that can climb into the five-billion-dollar range. Our shotgun market is drilling contractors, frac tank owners/cleaners. Our sniper view is drilling contractors and their rig wash and rig cleaning jobs. Add it to our shotgun view customers and we are a solid five to ten million dollars per year in revenue. Our customers are required by company, state and federal guidelines to clean their equipment or face stiff penalties, fines and lost production due to rig cleaning.

#### **COMPETITION**

Our competition in the Permian Basin is split into two categories, rig sales and brick mortar. The rig side of the competition is limited to Fair Winds Chemical of Oklahoma, Frew Brewer of Texas and Hotter 'n Heck located in Texas. We have gone toe to toe with all of these competitors and with a little effort were able to gain market share on some level and on the rig side we were number one for eighty percent of the time in service. We know our competition's products are all ready to use and are either too strong or too weak. We hold the advantage.

#### DIFFERENTIATION

We are different from our competition due to our direct marketing methods that allows our highly experienced and knowledgeable staff to zero in on the specific customer's needs and tailor their chemical solution to their exact issues. Our concentrated technology gives our customers the ability to custom tailor their cleaner strength to the job at hand. If they are to clean glass windows, they simply need to only add a capful of our solution to a gallon of water. They have a powerful yet safe degreaser that is more efficient and cost effective. We are superior in quality; servicing and our sales strategy is prolific.

#### **MARKETING STRATEGY**

#### Price:

We will have a relatively simple pricing structure that will stay stable, as our margins are high enough that we don't need to adjust pricing often. We will be selling a concentrated product that has three different formulas. The majority of our revenue stream, 80%, will be coming from our all-purpose cleaner that is sold by the gallon or 275-gallon totes and the price will range from \$120-\$3,300. Our other two products are a citrus degreaser and caustic based hardcore degreaser and they will be priced at six dollars more per gallon. The cost of chemicals fluctuating will subject our products to price change.

#### Place:

Redoubt Solutions will be located in Odessa, Texas. Our customers will primarily be from the Permian Basin. We will teach them about our products through direct marketing schemes and social media. We will be able to deliver on the spot for most orders, within 24 hours for in region and FedEx or another carrier for out of region.

#### **Promotion:**

Due to being a chemical distributor, our location will be a small warehouse with a small service desk in case a customer wants to come in and place an order, but 95% of our customers will receive their order on the spot. Our marketing will be a limited mixed model with the majority of customers seeing our products work on their rigs, tanks or equipment. Our reps will be able to prove our products are superior in efficiency and can easily beat competitors' prices. We will be battling against our competitions strengths as we are competitively priced while being a superior product.

#### VISION AND OBJECTIVES

Our vision at Redoubt Solutions is to supply the oil and gas producers of the United States with the highest quality and most effective concentrated cleaners and degreasers. Our 20 years of hard-earned industry expertise and battle born experience bred from surviving three major downturns has proven Redoubt Solutions to be resilient, dependable and successful. It is our ultimate belief that we will be the distributor of choice for U.S. oil and gas producers.

#### First Year:

Our operation will begin with the boots on the ground approach in the Permian Basin with our facility in Odessa, Texas. We will be purchasing our three products from our custom chemical blender in Boise, Idaho. Our focus at first will be on rigs and drilling and fracking contractors within a 4-hour driving distance.

#### Third Year:

As we establish ourselves we will also ramp up our marketing to reach further from our main base of operations. We hope to be selling 1100 drums a month by this time

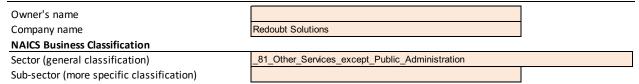

#### Fifth Year:

We fully expect to add consulting services into our operations. We have plans to increase sales by 25% a quarter through direct marketing campaigns as well as strategic partnerships with Jet Specialty, Distribution Now and Oilfield Industrial Supply. Another goal is to purchase and install 3 mixing plants in our Odessa facility and bring our mixing and labeling in house.

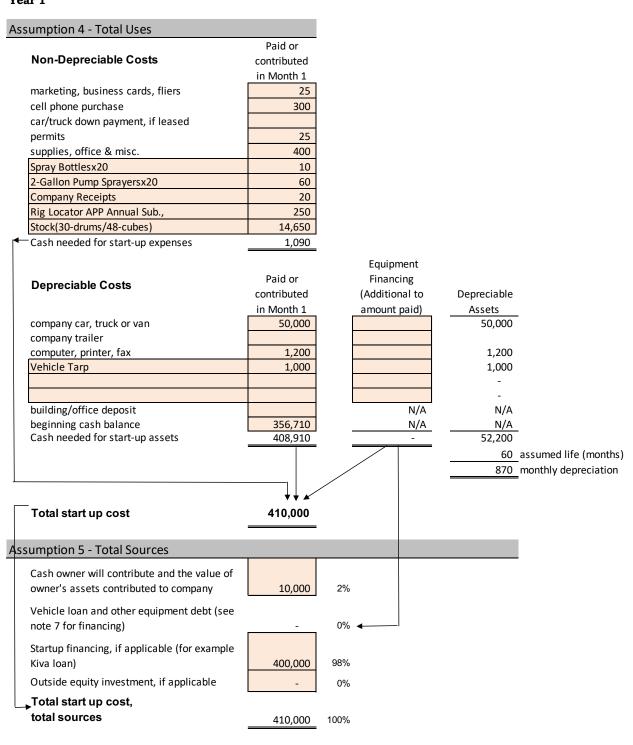

#### Tenth Year:

We plan to have expanded to Greeley, Colorado, in order to support our operations further north. We will have a facility and two reps in Williston, ND, who will service oilfields in that area. We will have added rig and frac tank cleaning operations to our Permian Basin operation as well.

#### START-UP COST

#### Start-up Costs Year 1
