## Regenerating Our Planets Garden

Business Plan June 2025

## TABLE OF CONTENTS

EXECUTIVE SUMMARY	1
LEADERSHIP STATEMENT	2
PRODUCT/SERVICE OFFERING	2
MARKET/INDUSTRY	3
COMPETITION	3
DIFFERENTIATION	3
MARKETING STRATEGY	4
VISION AND OBJECTIVES	4
START-UP COST	5
FINANCIAL STATEMENT (PRO FORMA)	6

#### **EXECUTIVE SUMMARY**

#### **Opportunity**

- Our planet is being degraded because of desertification.
- Farmers are using chemical disturbances like pesticides and fungicides.
- Our planet is warming and being affected by climate change and carbon dioxide.

#### **Customers**

- Restaurants
- Chefs
- Farmers markets
- Grocery stores
- Local residents
- Gardeners and farmers

#### **Marketing**

- Pure promotions
- Mixed model promotions
- Bootstrap marketing
- Strategic alliances with health stores, gyms and local chefs.

#### **Purpose**

- Instead of relying on the world to help itself we want to take the initiative and be a service forward by providing better nutrition through healthier foods.
- Form a functional chain of microecosystems, restoring the climate of the only planet.

#### **Differentiators**

- Our produce will be all natural with the help of a natural ecosystem.
- We will not only provide the community with healthier food but also teach, motivate and inspire.
- We will have animals living amongst our crops to create bonding and relationships with life and nature.

#### **Start-up Costs**

Owner investment - cash	\$	-
Owner investment - equity		-
Vehicle and/or equipment loan		-
Start up financing	60	0,000
Total start up costs:	\$60	0,000

#### Solution

- Regenerate agriculture
- Farming and ranching in synchrony
- Revitalize our earths soil which can hold carbon dioxide
- Organic compost with zero chemicals
- Focus on unity and health
- Promote a healthy lifestyle

#### Extras

- Organic warm composting facility on site.
- Beehives to produce honey and pollinate plants.
- Greenhouses
- Livestock around plants to provide plants with natural carbon as well
- Housing opportunities for felons

#### Financials & Extras

Sales:	\$ 558,500	100%
COGS	66,900	12%
Gross profit	491,500	88%
Overhead	171,400	31%
Pretax income	320,000	57%
Tax expense	80,000	14%
Owner withdrawals	36,000	6%
Net income	\$ 204,000	37%

#### **LEADERSHIP STATEMENT**

**CEO/CFO:** Frederick is a humble leader by nature who constantly exercises integrity, creativity, execution and team work. With a resilient attitude, he pursues not only the education and betterment of himself, but also those around him. In a professional setting, his commitment to executing tasks equips him to project forward when faced with adversity. He has also taken the initiative to further his knowledge by completing courses such as emotional literacy, certified defensive flagger, OSHA 10 certification and building resistance to name a few. He is an exceptional leader and has the ability to relate to individuals from all demographics. **CMO:** Patrick is a leader who leads by example while being empathetic and willing to admit

**CMO:** Patrick is a leader who leads by example while being empathetic and willing to admit faults. Once he learns something, he is dogged in his pursuit of excellence and dedication to completing the task. He showcases adaptability and ambitiousness and an ability to manage day to day tasks effectively.

**COO:** Daizon is a highly driven individual with over five years of experience in the food handling field. Daizon is always committed to seeing beyond the current reality, and even the current perception, to break stereotypes and shape new futures. He is a strong leader who meets and exceeds both customer and company expectations. Whatever he has to do to see happy customers in a family friendly environment, he will do.

#### PRODUCT/SERVICE OFFERING

Regenerating Our Planets Garden is an all-natural garden that is focused on health and nutrition. We will be supplying restaurants, food markets, and grocery stores with lettuce, tomatoes, onions, grapes, nuts, strawberries, apricots, peaches, plums, nectarines, cherries, kumquats, grapefruits, guava, rosemary, basil, thyme, boysenberries, raspberries, kale, broccoli, apples, banana, beef, milk, pork, eggs, tulips, potatoes, fish, chicken, duck and organic compost. We predict 35% will come from livestock, another 35% of our total revenue will come from our plants, 15% from our organic compost facility and the remaining 15% will come from our tours and lectures. Our plan is to begin production in the summer of 2026 on 5 acres of land in Decatur, Texas.

At RPG, we use a natural process called regenerative agriculture which means we will be synchronizing farming and ranching with nature to emulate a natural ecosystem which will regulate itself through diversity to prevent epidemics of pest and disease. The advantage we will have is that not a single plant or animal will be chemically induced. Our main focus is health because if we want to provide our customers with the best nutrition. In the future, our plan is to first functionalize at least one garden in every state, then at least one outside of every big city. To get things done efficiently it will take teamwork, consistency and patience. If we can create a functional chain of microecosystems around our big cities, we will create this macrosystem removing carbon dioxide from our atmosphere. Replacing it back within the soil, restoring our Earth and its climate.

#### MARKET/INDUSTRY

Regenerative agriculture made almost ten billion dollars last year. This market is set to grow by almost 15%. This industry offers premium quality foods with the long-term advantage of reducing fertilizer costs and pesticides. In this market, we will also have the opportunity to build our own local food system.

#### **COMPETITION**

Our direct competitors are conventional and industrial agricultural farmers and organic agricultural farmers. Our indirect competition will consist of vertical farmers and controlled environment farmers as well as bio-engineered or lab grown food producers. Since we will be placing our focus on health and nutrition we will have a huge advantage over the conventional system. The nutrients from our well-nourished soil helps produce a better, more natural product.

#### **DIFFERENTIATION**

In contrast to our competition, we value the natural creation of all life ranging from our very own all the way down to the simplest form. With our goal to involve the community in our projects, we plan to expand business beyond the measures of our targeted customers. Not only will we be selling crops and livestock, but we will also offer tours and guides for the education, inspiration and motivation of our society schools.

#### **MARKETING STRATEGY**

#### Price:

With our high-quality products, we plan to charge our customers fair prices based on the variation of the items and amount purchased. By keeping our product consistently priced with market average, we project to obtain many contracts from our target customers. For our tours at Regenerating Our Planets Garden we will be charging \$8 for adults, \$6 for teenagers and \$4 for kids.

#### Place:

Regenerating Our Planets Garden will be located in Decatur, Texas. Our customers will come from the DFW Metroplex and Denton county region. Our customers will learn about us from our salesmen, health stores and highway advertisements. We will also use fitness gyms, news and radio stations and word of mouth.

#### **Promotion:**

At Regenerating Our Planets Garden, we believe with the help of every hand as we stand caring for every breath by taking life and its natural journey we are truly able to pave better futures for the men building our futures. We plan to utilize mixed model and virtually free promotions by interacting with local schools, social events and communities. Social media platforms such as Facebook to keep devoted customers up to date. YouTube and its 2.3 billion subscribers to create a blog that viewers everywhere can check us out on and Pinterest for visualizations of the beauty of our business blended with nature.

#### VISION AND OBJECTIVES

Our founder is pescatarian, so this is a passion that flourished through the cracks of concrete by striving to get the best nutrition while wondering where does the food we are eating come from. The more we researched nutrition, the more we realized that nothing in life was about one person. We believe life is built and can only be maintained by creating healthy and nurturing relationships. Instead of relying on the world to help itself, at RPG, our goal is to take the initiative and be a service to the world by providing nutrition and healthier foods.

#### First Year:

We plan to have all our land developed with regenerated soil.

#### Third Year:

We plan to have our first full harvest.

#### Fifth Year:

We plan to reach our breakeven point.

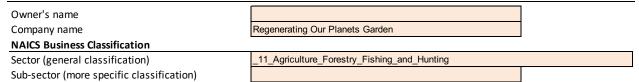

#### Tenth Year:

We plan to be fully be independent, profitable enough to begin our second farm.

#### Philanthropy:

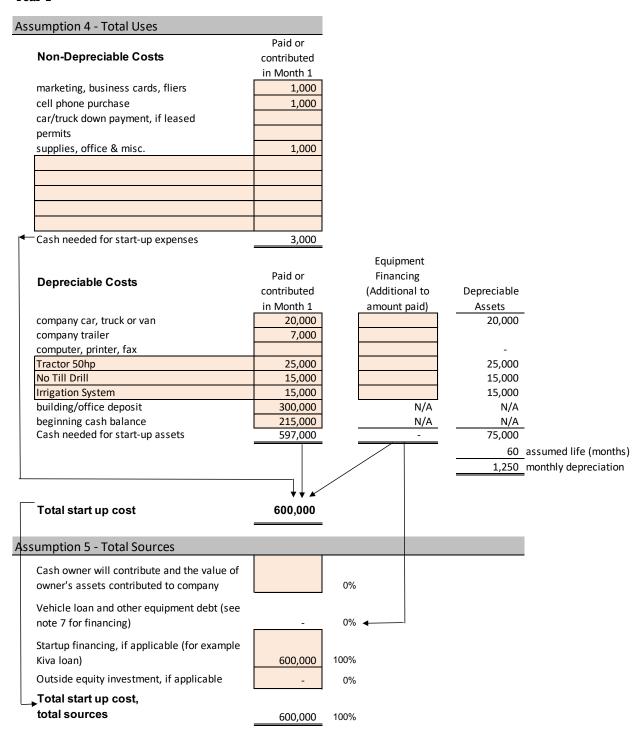

We can form a functional chain of micro ecosystems around our big cities we will create this macrosystem fulfilling our greatest purpose, restoring the climate of the only planet providing us hope.

#### START-UP COST

#### **Start-up Costs**

#### Year 1
